## EDUCATION

**Motilal Nehru National Institute of Technology Allahabad**  
*M.Tech - Computer Science and Engineering - CPI - 8.8*

**August 2025 – Present**  
*Prayagraj, India*

**Shri Govindram Seksaria Institute of Technology and Science**  
*B.Tech - Electronics and Instrumentation Engineering - CGPA - 7.70*

**December 2020 – April 2025**  
*Indore, India*

## COURSEWORK / SKILLS

- |                                |                                     |                                          |
|--------------------------------|-------------------------------------|------------------------------------------|
| • Data Structures & Algorithms | • Computer Networks                 | • OOPS Concept                           |
| • Problem Solving              | • Database Management System (DBMS) | • Computer Architecture                  |
| • Operating Systems            | • Artificial Intelligence           | • Neural Networks and Genetic Algorithms |

## PERSONAL PROJECTS

**CodeMentorX — AI-Powered Coding Buddy & Reviewer** [↗](#)

**September 2025 – December 2025**

*Tech Stack: React.js, Node.js, Express.js, MongoDB, JavaScript, AI APIs*

- Engineered an AI-powered code review system that detects logical bugs, edge cases, inefficient constructs, and refactoring opportunities, producing structured and actionable feedback.
- Designed multi-mode, stateless review workflows (standard, optimization, explainability, interview), enabling context-aware AI responses using a single scalable backend architecture.
- Implemented algorithmic reasoning support, including time & space complexity analysis, optimization insights, and step-by-step code explainability to improve correctness and performance awareness.
- Built a DSA learning playground with curated problem sets, explicit pattern tagging, and Think-Before-You-Code prompts, reinforcing structured problem-solving used in FAANG interviews.
- Developed interview simulation, security checks, analytics dashboard, and marketplace modules while maintaining clean separation of concerns.

**CorpQueryX — Corporate Query Management System** [↗](#)

**June 2025 – August 2025**

*Tech Stack: React.js, Node.js, Express.js, MongoDB, n8n (Workflow Automation)*

- Architected a multi-tenant orchestration system using n8n and PostgreSQL to manage secure corporate document ingestion and administrative access controls.
- Engineered a hierarchical RBAC engine that dynamically filters natural language queries based on organizational rank, ensuring zero unauthorized data exposure.
- Developed a secure web interface and API gateway to bridge frontend requests with asynchronous n8n workflows, managing JWT-based authentication and session state.
- Optimized database-level data isolation to prevent cross-departmental leakage while maintaining sub-second search latency for enterprise-scale datasets.

## TECHNICAL SKILLS

**Languages:** C, C++, Python, Java, JavaScript  
**Web Technologies:** HTML, CSS, React.js, Node.js, Express.js  
**Developer Tools:** VS Code, Git, Github  
**Databases:** MongoDB (NoSQL), PostgreSQL (Relational)  
**Operating Systems:** Linux, Windows, Android

## Achievements

- GATE CSE 2025:** Achieved **All India Rank (AIR) 1,852** among **170,825 candidates**, reflecting solid foundations in computer science fundamentals.
- Solved **500+** Data Structures and Algorithms problems across multiple coding platforms.
- ICPC Regionals Prelims:** Participated **twice** in the International Collegiate Programming Contest preliminary rounds, gaining experience in team-based competitive programming under time constraints.
- JEE Main 2020:** Secured **All India Rank (AIR) 78,041** with a **percentile of 92.97**, demonstrating strong aptitude in mathematics and analytical problem-solving.
